

FOR IMMEDIATE PUBLICATION AND DISTRIBUTION

Portland Press partners with ScienceOpen to foster research in neuronal signaling

Berlin & London, March 12, 2019

[Neuronal Signaling](#), an open access journal published by [Portland Press](#), joins [ScienceOpen](#) to foster research and reviews on all aspects of signaling within and between neurons in the form of an [interactive featured collection](#) on the platform.

Owned by the [Biochemical Society](#), Portland Press promotes the future of molecular biosciences and the wider life sciences. *Neuronal Signaling* is an online-only, fully open access journal grounded in the fields of cellular signaling pathways, biochemistry, and molecular biology. It spans a variety of neuroscientific disciplines, from molecular mechanisms of neuropathologies and neurodegeneration, to signaling in consciousness and memory. All articles in the journal are published with a CC BY Creative Commons License. Open for submissions, you can [submit](#) your article to *Neuronal Signaling* today.

ScienceOpen and *Neuronal Signaling* are both committed to increasing the visibility of neuroscientific research. Placed within the ScienceOpen discovery platform of over 52 million article records, the '[Neuronal Signaling](#)' featured collection is contextualized within a broad and interactive environment of dynamic sorting and filtering tools. Interactive features such as community curation, article reviews, comments, and recommendations create a forum for researcher engagement and increase research discoverability.

ScienceOpen highlights the new '[Neuronal Signaling](#)' collection in its research discovery environment as an important initiative to optimize the scientific and social impact of neuroscientific research.

Stephanie Dawson, CEO of ScienceOpen, says "We are very excited to work with Portland Press, a leading independent society publisher, to promote this journal. There is a real need for high-quality open access publishing venues at this transitional moment in scholarly communication. The range and quality of articles in the Neuronal Signaling Collection attest to the rigor and care that authors can expect when publishing with Portland Press and ScienceOpen is designed to showcase that excellence."

Professor Richard Reece, Chair of Portland Press Board, says:

"Sustainable open access is very much part of our objectives at Portland Press. The new collection page with ScienceOpen will further increase the availability of *Neuronal Signaling's* outstanding research, helping it to reach new and engaged

About ScienceOpen: From promotional collections to Open Access hosting and full publishing packages, [ScienceOpen](#) provides next-generation services to academic publishers embedded in an interactive discovery platform. ScienceOpen was founded in 2013 in Berlin and Boston by [Alexander Grossmann](#) and [Tibor Tscheke](#) to accelerate research communication.
