SO

An Interactive Environment for your Content on ScienceOpen

You need to go beyond your webpage for professional hosting of your scholarly content that maximizes the presence of your journal in the internet and reduces the time you spend on distribution.

ScienceOpen can host your open access journal, conference or books in an interactive environment with state-of-the-art SEO and integration with ORCID, Crossref and more.

ScienceOpen is a freely accessible research communication platform with the technological infrastructure to support multi-dimensional search, community curation, and researcher networking. We provide space and services to publishers to promote their content - from enriched metadata and promotional packages to open access hosting solutions and custom-tailored publishing environments.

Publisher benefits when hosting within the ScienceOpen discovery environment:

- **Context:** Host your journals within the context of 60 million article records on ScienceOpen including banner marketing and search highlights.

- **Integration:** ScienceOpen connects your digital content to the world with Crossref, ORCID and Altmetric™ integration, indexing by Google Scholar and Baidu Scholar, long term archiving and A&I services.

- **Community:** Use ScienceOpen infrastructure to build communities around your books and journals. Users can curate, share, recommend, comment, or review articles, conference papers, books and chapters.

Open Access Hosting on ScienceOpen

- Full XML, PDF and epub downloads via read button
- DOI deposit with Crossref, integration with ORCID; long term archiving, output to A&I services

We are very pleased to be working in partnership with ScienceOpen – allowing the vast body of work we have gathered to be accessible to as wide an audience as possible. The collection of high-quality content from these conferences will provide essential knowledge to IT academics, professionals and the public alike.

Ian Borthwick, Head of Publishing, BCS Learning and Development
