

## An Interactive Environment for your Content on ScienceOpen

**You** need to go beyond your webpage for professional hosting of your scholarly content that maximizes the presence of your journal in the internet and reduces the time you spend on distribution.

**ScienceOpen** can host your open access journal, conference or books in an interactive environment with state-of-the-art SEO and integration with ORCID, Crossref and more.

**ScienceOpen** is a freely accessible research communication platform with the technological infrastructure to support multi-dimensional search, community curation, and researcher networking. We provide space and services to publishers to promote their content - from enriched metadata and promotional packages to open access hosting solutions and custom-tailored publishing environments.

**Publisher benefits when hosting** within the ScienceOpen discovery environment:

- **Context:** Host your journals within the context of 85+ million article records on ScienceOpen including banner marketing and search highlights.
- **Integration:** ScienceOpen connects your digital content to the world with Crossref, ORCID and Altmetric™ integration, indexing by Google Scholar and Baidu Scholar, long term archiving and A&I services.
- **Community:** Use ScienceOpen infrastructure to build communities around your books and journals. Users can curate, share, recommend, comment, or review articles, conference papers, books and chapters.

## Open Access Hosting on ScienceOpen

- Full XML, PDF and epub downloads via read button
- DOI deposit with Crossref, integration with ORCID; long term archiving, output to A&I services
- Context environment of 85+ million records driving search and discovery for your content
- Dynamic search and filtering of all content at journal, publisher, author, article, and collection level
- Collections promoted with a banner on all relevant content in 85+ million article records
- “Submit manuscript” button on Collection leads to your website (manuscript submission system available)
- Article and journal level usage statistics on the fly and extensive monthly usage reports
- Author profiles and self-promotion tools for users to add lay summaries and share and track their work
- Community-run, researcher-led topical collections further promote usage
- Commenting and recommendation, post-publication peer review functionalities to engage community

*Electronic Workshops in Computing (eWiC)*

The eWiC Series gives free access to the proceedings of workshops and conferences on the broadest possible range of computing topics. Each set of proceedings is based on a specialist workshop and is designed to provide information that represents a snapshot of current knowledge, debate or research.

Leveraging Wisdom of the Crowd for Decision Support  
Simo Hosio, Jorge Gonçalves, Theodoros Anagnostopoulos, Vassilis Kostakis (2016)

While Decision Support Systems (DSS) have a long history, their usefulness for non-experts outside specific organisations has not lived up to the promise. A key reason for this is the high cost associated with populating the underlying knowledge. Show more

*We are very pleased to be working in partnership with ScienceOpen – allowing the vast body of work we have gathered to be accessible to as wide an audience as possible. The collection of high-quality content from these conferences will provide essential knowledge to IT academics, professionals and the public alike.*

Ian Borthwick, Head of Publishing, BCS Learning and Development
